Everything you wanted to know but were afraid to ask*

### 12:30pm-1:00pm

CF-SGNA Business meeting

## Objectives

- Describe the anatomy and physiology of the lower esophageal sphincter, discuss the diagnostic tests that best stratify patients, and summarize the clinical, endoscopic, and pathologic markers of progression of GERD.
- Recognize characteristics of hyperplastic polyps, tubular, villous, and sessile serrated adenomas. Determine the best method for resection of a polyp based on the type and size. Learn key tips for a successful colonoscopy.
- Discuss how to diagnose inflammatory bowel disease (IBD) in pediatrics. Review the treatment strategies for pediatric IBD in 2020. Provide evidenced based management in pediatric IBD.
- Contrast the scope of interventional radiology as it relates to gastroenterology emergencies.

## Parking

Please park in the **Orange** parking garage located at the MacDill Ave. entrance. Conference is located in the **Medical Arts Building**.

## Cost

This program has been approved for 4.0 CEU's by the state of Florida Board of Nursing (provider 50-1867) (course 678137).

- SGNA member: \$10
- Non-member: \$20
- GI techs and students: FREE
- Cash, check, or money order day of event payable to: **CF-SGNA**
